## THE ADVANTAGES

## Aesthetics and integration:

The ARCASHED ${ }^{\circledR}$ can be fitted with an ARCALAM ${ }^{\ominus}$ type natural smoke and heat exhaust ventilator system in one of its slopes.

The ARCASHED ${ }^{\circledR}$ displays excellent resistance to high and low pressure on particularly exposed façades or sheds thanks to the aluminium struts that support the translucent lighting surfaces.

Easy to install:
The full kit is delivered ready to assemble with simple tools and clear installation instructions. It includes the fasteners and all the seals.

## STRUCTURE

- Self-draining supporting profiles (hip or arch)
- Glazing bead profiles (cover joint fitted with EPDM seals)
- Metal edge profiles used to attach the hip or arch profiles, collect and drain away rainwater run-off and condensation in the lower part and hold the glazing in the lower part
- Ridge for complete watertightness
- Stainless steel fasteners

## GLAZING

- 10 mm opal multi-wall structured polycarbonate, $\mathrm{Ug}=2.7 \mathrm{~W} / \mathrm{m}^{2} . \mathrm{K}$

The ARCASHED ${ }^{\circledR}$ is a daylighting strip with a minimum $11 \%$ (or $6.28^{\circ}$ ) slope, consisting of an extruded aluminium structure and vertical synthetic glazing (polycarbonate). Height: up to 7 metres with intermediate struts according to the height (please contact us for heights over 7 metres).

## -OPTIONS

Glazing
(according to dimensions)

- Opal IR S.PC 10
-Transparent S.PC 10
-S.PC 10 + Lumirar
- Opal IR S.PC 16
-Transparent S.PC 16

## - CONFORMITY AND IMPLEMENTATION

Fastening and sealing must comply with the requirements set out in French legislation (DTU) series 40 and 43 currently in force.

## - SIZE RANGE

- Dimensions: from 1.00 Im to 7.00 Im of slope, no length limit
- Pitch from $31^{\circ}$ to $90^{\circ}$
- Self-supporting structure up to 1.50 Im for profiles with small chord (beyond this length, use intermediate rails)
- Self-supporting structure up to 3.00 lm for profiles with large chord (beyond this length, use intermediate rails)

## - GLAZING PERFORMANCES (ACCORDING TO SIZE)

Other glazing: see "Glazing" technical data sheet
